RIDERS (1681.)

British Merlin:

BEDECT WITH

Many delightful Varieties,

and useful Verities,

Fitting the Longitude and Latitude of all Capacities within the Islands of *Great Britains* Monarchy.

And Chronological Observations of Principal Note to this Year 1681.

Being the FIRST from

The *Bissextile* or *Leap-Year.*

WITH

NOTES of Husbandry,

PHYSICK, FAIRS, & MARTS,

Directions and Tables to all necessary Uses.

Made and Compiled for the Benefit of his Country,

By *CARDANUS RIDERS.*

LONDON: Printed by *Tho. Newcomb,* for the Company of *Stationers,* 1681.

ALL Measures of Longitude are deduced from Barley Corns: Three Barley Corns make an Inch, Twelve Inches one Foot, Three Feet one Yard, Five Yards and an half one Statute Pole, or Perch, Forty Perches make a Furlong, Eight Furlongs make an English Mile, in a Mile are Three hundred and twenty Perches or Poles, One thousand sixty six Paces: Ells, One thousand four hundred and eight: Yards, One thousand seven hundred and sixty: Feet, Five thousand two hundred and eighty: Inches, Sixty three thousand three hundred and sixty; and Barley Corns, One hundred ninety thousand and eighty.

The Circumference of the *Earth* and *Sea*, jointly is 25036 Miles, and the Diameter 7966 Miles, and its Semidiameter 3983 Miles, according to *English* Mensuration.

The Dimensions of England, and the adjacent Islands

THE Length of *England*, from South to North, is 386 Miles, the broadest place from the Lands end to *Sandwich*, is 279 Miles; the next broadest place, which is between St. *Davids* and *Yarmouth* in the East, is 240 Miles; the whole Compass of *England* is 1532 Miles.

The Length of *Island*, *North* and *South*, is 303 Miles; the greatest breadth thereof, *East* and *West*, is 112 Miles; the whole compass of the Main Land is 948 Miles.

The greatest Length of *Scotland*, *South* and *North*, is 480 Miles; and the Breadth *East* and *West*, is 165 Miles; the whole compass 1100 Miles.

The *Isle of Man* is in Length 28 Miles, the Breadth 18 Miles, and in Compass 91 Miles.

The *Isle of Anglesey* is in Length 21 Miles, in Breadth 18 Miles, in Compass 85 Miles.

The *Isle of Wight* is in Length 22 Miles, in Breadth 11 Miles, in Compass 57 Miles.

The *Isle of Garnsey* is in Length 13 Miles, in Breadth 9 Miles, the whole Circumference is 36 Miles.

The *Isle of Jersey* is in Length 10 Miles, in Breadth 6 Miles, in Compass 28 Miles.

Containing Europe, Aſia, Africa, *and* America.

Europe contains in it theſe Provinces, Germany, Swedland Denmark, Italy, Muſcovia, Hungaria, France, Spain, Polonia, Sclavonia, Norway, Grecia. The moſt eminent Iſlands are theſe, Great Britain, Ireland, Sardinia, Candia, Nigropont, and Corſica.

The greateſt length of this part of the World, is, 3000 Miles, the breadth 900.

Aſia, the biggeſt of the four, and firſt known part of the World, contains theſe principal Regions and Iſlands, *viz.* Armenia, Anatolia, Perſia, Aſſyria, China, Syria, Arabia, Meſopotamia, India, Parthia, Media, Paleſtine, Caldea, Tartaria.

In *Africa* are theſe Provinces, *viz.* Egypt, Barbary, Æthiopia, Nubia, Abaſſines, Alonemotopa, Lybia. The Iſlands, Magdagarde, St. Thomas, Inſula de Cape de Verde, Inſula de Canaria, Inſula de Madera.

America, the fourth part of the World, and of the lateſt diſcovery, conſiſteth of theſe two parts, Mexicana, and Peruana.

The Provinces of Mexicana, are Nova Hiſpania, Terra Florida, Nova Albonia, California, Norimbega, Nova Francia, Eſtotiland. The chief Iſlands of Mexicana, are Greenland, Heland and Friſland.

The Provinces of Peruana, are Braſil, Piſal de Chibana, Peru de Cartanen, Chila, Charon, Chico, Paragores. The chief Iſlands of Peruana, are Hiſpaniola, Cuba, Jamaica, and many others.

A Table of Expences and Wages.

Since

into England by Bennet a Monk	1011
Saint Pauls Church burnt	595
London-bridge new built of timber	517
London-bridge with thirty three years labour finished with stone	472
London-bridge burnt	467
Tiling first used in London	434
A Frost from the midst of September till April	317
The first use of Guns	271
Painting first used in England	241
Register-Books in every Parish	143
The Swearing Sickness	130
The first use of Coaches	126
The last firing of Pauls Steeple	119
A great Frost and sudden Thaw, which brake many Bridges.	115
The Royal Exchange finished	108
A great Snow fell the 4th of February	95
A Blasing Star in May	101
A great Plague whereof died in one year in London 30578.	78
A great Snow.	66
The River of Thames frozen, that people for many days walked over, and fires roasting Mear on the Thames	45
The last fire on London-bridge.	49
A Blasing Star in December	38
The Rebel Parliament began November the Third, 1640.	40
King Charles the Second his happy arrival at London, May 29. 1660.	21
Two Comets seen in Dec. and March	17

The

Since { The sad Mortality that followed, whereof died of the Plague that were taken notice of, besides many others, 98596.
16
The most dreadful Fire in London, that followed them, Sept. 2, 3, 4, 5. 15.

Beer Measures.						
Pints	288	144	72	8	4	2
Quarts	144	72	36	4	2	1
Pottles	72	36	18	2	1	
Gallons	36	18	9	1		
Firkin	4	2	1			
Kilderkin	2	1				
Barrel	1					

Ale Measures.						
	256	128	64	8	4	2
	128	64	32	4	2	1
	64	32	16	2	1	
	32	16	8	1		
	4	2	1			
	2	1				
	1					

The Use of this Table is thus: There is contained in Barrel 288 Pints, in the first row; in a Kilderkin 144 Pints; in a Firkin 72 Pints; in a Gallon 8 Pints; in a Pottle 4 Pints; in a Quart 2 Pints. Or thus, One Barrel is two Kilderkins, 4 Firkins 36 Gallons, 72 Pottles 144 Quarts, 288 Pints; and so of the rest, is being so easie is no further explanation.

Chief Notes of this Year, 1681.

The Exchequer opens eight days before any Term begins, except *Trinity Term*, before which it opens only four days; Note, That the firſt and laſt days of every Term are the firſt and laſt days of Appearance.

The

The Subsequent Diary Explained.

THe Year consisting vulgularly of twelve Months, is contained in twelve Pages; each Month is divided into nine Columns: In the first of which is placed the Days of the Month.

In the second, the Days of the Week, B being this years Dominical Letter.

The third contains the Feasts fixed and moveable, in a Planetary way, the beginning and end of the Terms, and the Suns ingress into the Signs.

The fourth shews the Sign wherein the Moon is every day at Noon.

The fifth shews the Hour and Minute of High Water at *London-Bridge* every day.

The sixth hath a Diary Judgment of the Weather.

The seventh on the blank side is Sunrising.

The eighth is Sun-setting every day in the Year.

The Ninth Notes of Husbandry and Physick.

January hath xxxi. days.

This is the Seaſon for good Husbands to lop and prune ſuperfluous Branches from Fruit-trees: Uncover their Roots; ſet all kind of Quick ſets and Fruit-trees in the New of the Moon. Be ſure the Wind be not North, nor Eaſt; and ſet the ſame ſides to the South and Weſt, which grew at the firſt. Set Beans. Peaſe, and Parſnips: The Weather mild, and Moon decreaſing, Dig Gardens: Drench weak and ſick Cattle, Kine, with Verjuice; Horſes with Water and Ground Malt, ſodden with a little Bran.

In this Month let not Blood, nor uſe Phyſick, unleſs neceſſity conſtrain thee; beware of taking cold, for Rheumes and Flegm do much increaſe this Moneth: Its hurtful to faſt long, to drink White Wine faſting is good. Uſe Meats that are moderately hot, for the beſt Phyſick is warm diet, warm Cloaths, and a merry honeſt Wife.

February hath xxviii. days.

This Month set, cut, and lay Quicksets and Roses, as all other Plants. Set and Plant Vines, Hops, and all Fruit that grows on Bushes. Sow Pease, Beans, and Onions: furnish your Gardens with Sallads and Pot-herbs for Summer; Prune and trim all sorts of Fruit-trees from Moss, Canker, and superfluous Branches. Remove Grafts or young Trees, in the last quarter, the Moon being in *Aries*, *Libra*, or *Scorpio*.

If necessity urge, you may let Blood, but be sparing in Physick, and be sure when a warm day comes, to prevent taking of cold, through carelessness; for the warm Air this Moneth is not lasting, but oft deceives us to our prejudice.

In this Month, Slimy Fish, Milk, and the like, that do opilate and stop the Liver, and the Veines, and thicken the Blood, are to be eschewed as Enemies to Health.

March hath xxxi. days.

Now regarding the Wind and Weather, graft, cut Quicksets, cover the Roots of Fruit-Trees (opened in *December* and *January*) with fat Earth, sow Oats, Barley, Parsnips, Onions, Carrots, Melons, Cucumbers, and all kind of Pot-herbs. Slip Artichokes and Sage, and sow all manner of Garden Seeds.

Now advise with the honest and able Astrological Physician; it is good to purge and let blood: for in this month the humours and blood increase, and gross feeding breedeth gross blood and humours: therefore use meats of good digestion, and such as afford good juice and nutriment to the body: forbear all things salt, purge the blood by potions and blood-letting; sweet meats and drinks are commendable: be sure to eat in the morning before you drink.

This month commands the provident Houſwife, and the prudent Artiſt, to ſet their Stills on work. In the beginning of the Month ſow and ſet thoſe tender Summer Herbs that would not endure the former co'd. Weed your Hop Gardens, cut off ſuperfluous Branches, Moſs Trees and Gardens, and weed Corn; riſe early and walk the Fields and Gardens.

Now every Garden and Hedge affords thee Food and Phyſick. Riſe early, walk the Fields by running ſtreams, the North and Weſt ſides. Sage and Sweet Butter, an excellent breakfaſt. Clarified Whay with Sage. Scurvey Graſs Ale, and Worm-wood Beer, are wholſome Drinks. Green Whay excellent againſt Choler. Eat and drink betimes in the morning. Abſtain from Meats that are hot in Nature, and ſalt in Quality.

June hath xxx dayes.

At the Full of the Moon this Month and next, gather your Herbs to keep dry for the whole year. Set Rosemary and Gilliflowers, sow Lettice and Radish, three or four days after the Full, and they will not run to Seed. Shear your Sheep, the Moon increasing. Take heed of cutting Herbs or Flowers with Knife, but rather gather them with your Fingers.

Let honest moderate Labor and Exercise procure your Sweat. Use thin and light Diet, and chaste Thoughts, tend to Health. Lie not unadvisedly on the Ground, or over-haltily drink.

Distilling of Roses, and made of Syrups and Conserves are now in prime: Use a light and thin Diet, for the Stomach is weaker now than in the former Months: Clarified Whey boiled with cold Herbs, are very wholesome.

Get Rue, Wormwood, and Gall, to strew on your Floors, to destroy Fleas. At the Full Moon gather Flowers and Seeds, dry your Flowers rather in the shade, than in the Sun, which too much exhaleth their vertue; but to avoid corruption, let the Suns heat a little visit them.

Beware of violent heat, and sudden cold, which are the great distempers of this Month, and produce pestilencial diseases: Forbear superfluous drinking, but eat heartily; use cold herbs and meats, abstain from Physick. Now the Rivers are more wholsom than the Baths. In time of Pestilence keep your Chamber windows shut till the Sun have force of shining. Perfume your Chamber every morning with Tar, upon a Chafing-dish of Coals: Use *Cardus Benedictus* boiled, and drink fasting.

Now with thankfulness reap your desired Harvest: sow Winter Herbs in the New of the Moon. Esteem fair weather as precious, and mispend it not. Gather Garden-seeds near the Full. Use moderate Diet, forbear to sleep presently after meat. Take heed of sudden cold after heat.

Beware of Physick and Bloodletting in the Dog days, if the Air be hot; otherwise, if occasion require, you may safely make use the eof. Now moderate Diet is best beware of Surfeits, Heats, and Colds, for Plurifies are engendred thereby Use not to sleep much, especially in the afternoon, for that brings opilations, headach, agues, and Cathars; and all notorious distempers of the same kind. Red Wine and Claret are excellent Remedies for Children against the V[illegible].

September hath xxx. days.

The beginning of this Month and the end of the former, gather Hops, their Complexion being brown, and the weather fair, and no dew on the ground. Kill Bees. make Verjuice, remove and set all slips of Flowers, between the two Lady days; remove Trees from *September* till *February*, especially in the new of the Moon. The weather warm, and the Wind South or West, cut Quicksets, gather ripe Fruit, sow Wheat and Rie, Winter Parsnips and Carrots: and set Roses, Strawberries, and Barberries.

Now as the year declines, provide your Winter Garments, hang them on loosly, to prevent that you might after repent of: Good for Physick and Phlebotomy.

Sow Wheat and Rie, remove young Plants and Trees about the New Moon, obſerving this as a ſeaſonable Secret, that in ſetting, or carefully place that ſide to the South and Weſt which were ſo before you took up the Plant; otherwiſe the cold kills it. Gather your remaining Winter Fruit, ſet all kinds of Nuts and Acorns, and cut Roſe-trees but once in two years, if you intend to have ſtore of Roſes.

The Garments you laſt Moneth hung on your backs in jeſt, now Button them cloſe in good earneſt: Cloath you now for prevention, or the cold comes inſenſibly, and Fogs oftimes begets a whole Winters cold. Conſult with your Tailors, as well as Phiſitians.

Set Crab-tree ſtocks to graft on: In the old of the Moon, ſet Peaſe and Beans, and ſow Parſnips and Carrots: Trench Gardens with dung, uncover the Roots of your Apple-trees, and ſo let them remain till *March*; Kill Swine in or near the Full of the Moon, and the fleſh will the better prove in the boiling.

The beſt Phyſick this month is good exerciſe, warmth, and wholſome meat and drink: but if any diſtemper afflict the body, finiſh your Phyſick this month, and ſo reſt till *March*, unleſs neceſſity urge: uſe good meat and wholſom drinks to nouriſh the blood: be ſure to go dry of your feet; for if not, (unleſs it be thoſe always uſed to it) be certain to be troubled with Rheums, and cold, and other inconveniences attending.

In the last quarter of the Moon, this Month and the next, are the best times to fell Timber: Let Fowlers mind their Game. Cover all your best Flowers and Herbs from cold and storms, with rotten Horse-dung. Look well to thy Cattle, Blood Horses. Let a warm fire, and a cup of *Nectar* be thy Bath; the Kitchin thy Apothecaries Shop, hot Meats and Broths thy Physick, and a well spread Table the proof of thy Charity to thy poor Neighbors.

Advertisement.

CLARK's Famous Spirit of Scurvy-Grass, Compound, Plain, and Golden, the Plain Working by Urine, the Golden by Stool. It purifies the whole Mass of Blood, and never failed in Curing the Scurvy, Dropsie, Stone, Gout, and several other Distempers, prepared by *Henry Clark* Chymist and Apothecary at the *Lamb* near *Somerset-House* in the *Strand*, and sold at 1 s. p. Bottle, by *William Nott* in the *Pall-mall*, *Tho. Loring* in *Fleet-street*, *Jo. Wilkins* in *Cheapside*, and *Robert Hanford* in *Cornhil*.

A Delcription of the four Quarters of the Year

THe *Spring Quarter* begins this year upon *Wednesday*, *March* the 9th, at 43 min. past 8 at night, at which time the Sun enters the Equinoctial Sign *Aries*, causing an equality of day and night all the habitable World over.

Summer takes beginning upon Saturday, *June* 11. at 22 min. past 11 in the forenoon, the Sun then approaching our *Zenith*, and enters the first Scruple of the Tropical *Cancer*, making longest days with us and shortest nights.

Autumn or Harvest quarter begins when the Sun touches the first Scruple of the Æquinoctial Sign *Libra*, which this year will be upon Monday *September* the 12, 6 min past 2 afternoon, again equalizing both day and night.

Winter begins *Sunday*, *December* 11, 58 min. past 2 in the morning the Sun then touches the first Point of the *Tropical* Sign *Capricorn*, making the shortest day, and longest night in the year, on this side the Æquator, as also the longest day and shortest night to those persons who inhabit the Southern parts of the World.

Of the Eclipses that happen this Year, 1680.

FOur times this year will the *Luminaries* be *Eclipsed*, twice the *Sun* and as often the *Moon*. The first *Eclipse* of the *Sun* falls *March* the 10, about in the morning, and therefore not visible to us, but to our *Antipodes*. The second of the *Sun* falls *September* the 3, near 2 deg. of *Virgo*, about 3 in the morning, 'tis a small *Eclipse*, and Inconspicuous to us.

The first *Eclipse* of the *Moon* falls in 14. 35. of *Virgo*, but invisible to us, though considerably great, for eight parts of the Moons Body will be darkned, and begins *Febr.* 22. 46 min past 9 in the morning, visible to our *Antipodes*. The second *Eclipse* of the *Moon* falls *August* 19, and begins at 2. 16. 40. in the morning, and may be visible to us if the Air be clear, the middle time or greatest obscuration should be 48. 42. after 3 and the end at 5. 20. 12. mane, whole duration 3. 3. 30. and he digets Eclipsed. 9. 51.

A true and plain Description of the Highways in *England* and *Wales*.

From London to Cambridge 44 miles, thus accounted;
